Re.: Steel Tariffs

Attn: Department of Commerce, Wilbur Ross

We're writing this letter regarding the recent enactment of a 25% duty on stainless steel will be detrimental in our ability to remain competitive against imported good in our industry.

We purchase the #8 Non-Directional finish stainless steel in the #304 alloy through Mirror Metals which is not produced in the U.S.A. It is crucial in the production of our products.

We also purchase the #430 Bright Annealed finish stainless steel and the quality in the U.S.A. is not consistent nor is the clarity and brightness the same. It is crucial for the consistency of the finished surface and quality to remain the same for our business.

Our main concern with the extra 25% duty now charged, we will not be able to compete with foreign companies in our industry since there is no duty on completed parts.

Sincerely,

President

Department of Commerce
Attn: Wilbur Ross

Dear Sir,

The recent duties on imported steel has greatly affected my business which sells a 304#8 and a 430 brite annealed product for automobiles. This product is not produced in the USA, and therefore I purchase these through a company, MIRROR METALS, which imports it.

Please produce an exemption for this type of stainless steel mentioned above, since it is not produced here in the USA. I now have to compete with foreign manufacturers of my finished products as they have no such duty on their finished products which they are selling to U.S. customers.

This 25% tariff punishes my small business because I cannot buy it here in the USA anyway. Please make an exemption for this Stainless product.

Sincerely,

-

U.S. Department of Commerce
Attn: Wilbur Ross
1401 Constitution Ave NW
Washington, DC 20230

Dear Mr. Ross,

Our company is a U.S. manufacturer of fenders and brackets for trucks. We manufacture these parts from 430 Bright Annealed Stainless Steel. I am writing to make you aware that the recent enactment of a 25% duty on 430 Bright Annealed Stainless Steel will be detrimental in our ability to remain competitive against imported goods in our industry.

The quality of the 430 BA stainless that we purchase through Mirror Metals is not produced in the USA. The USA quality is not consistent nor is the clarity and brightness the same. Consistent quality and surface finish is essential in the production of our products. We fear that with the extra 25% duty now charged we will be unable to compete with foreign companies in our industry since there is no duty on completed parts.

We respectfully ask that you consider an exemption of the duty for Mirror Metals.

President

Subject: FW: New Item Announcement!

June 30, 2015

Dear Valued Customer:

MIRROR METALS is excited to announce:
Stainless Steel Alloy 430
"MM-C.B.R." CLEAR BRIGHT ANNEALED

CLEAR BRIGHT ANNEALED SOFT TEMPER 430 Stainless Steel Sheet is the most popular of all the straight chrome stainless steels. Its principal use is for decorative purposes. Because of its excellent heat and corrosion resistant properties, its ductility and because it costs less than the chrome-nickel grades, this Type 430 Stainless Steel Sheet is used in countless applications. Used primarily for decorative purposes including household appliances, metal molding, metal trim, cabinet hardware, hinges, drawn and formed parts and stampings.

Mirror Metals C.B.R. is the brightest, most clear, 430 BA Stainless Steel in the industry today.

Thickness: 14 through 26 Gauge
Inquire for special sizes: Sheets, Blanks, and Tube
In stock: 14 through 26 Gauge

We have one of the industry's largest in-stock Specialty Metal Finish inventories, along with nonstandard sizes. That means fast delivery for you!
